DATE MAILED: 10/21/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/022,992

Applicant(s)

KURAKAKE ET AL.

Examiner

Thong H. Vu

Art Unit

2142

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 August 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-5, 7-9 and 11-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-5, 7-9 and 11-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

1. Claims 1,5,7-9,11-14 and new claims 15-20 are pending. Claims 6,10 are cancelled.
2. This application claims priority of Dec 18 2000.

Response to Arguments

3. Applicant's arguments, see pages 10-11, filed 8/18/05, with respect to Hunt et al have been fully considered and are persuasive. The 101 and 112 of Rejections has been withdrawn.

Claim Rejections - 35 USC § 112

4. The applicant should use this period for response to thoroughly and very closely proof read and review the whole of the application for correct correlation between reference numerals in the textual portion of the Specification and Drawings along with any minor spelling errors, general typographical errors, accuracy, assurance of proper use for Trademarks (tm), and other legal symbols ®, where required, and clarity of meaning in the Specification, Drawings, and specifically the claims (i.e., provide proper antecedent basis for "the" and "said" within each claim). Minor typographical errors could render a Patent unenforceable and so the applicant is strongly encouraged to aid in this endeavor.

Claims 3,7,9 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention (i.e.: such that).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,5,7-9,11-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Snyder [6,643,641 B1] in view of Takahashi et al [Takahashi 5,819,261].

5. As per claim 1, Snyder discloses A method of searching for contents information presented by a plurality of information sites over a network based on a query sent from a client terminal to a searching server through the network, the method comprising the computer-implemented steps of:

prompting the client terminal to input a query [Snyder, col 16 lines 37-50;col 2 lines 10-21;col 24 lines 21-35]

enabling the client terminal to transmit the query to the searching server through the network [Snyder, col 10 lines 39-59],

operating the searching server according to the query to search for one (or more) of the information sites having contents information matching the query [Snyder, col 3 lines 50-col 4 line 2], and to send back directory information indicative of locations of the searched information sites to the client terminal [Snyder, col 10 lines 39-59];

operating the client terminal according to the directory information for accessing the searched information sites [Snyder, col 25 line 58-col 26 line 10]; and

Snyder also taught the criteria performed by two agents and provide the result to the user. However Snyder does not detail

“the query containing an item keyword indicating an item as a target of searching (i.e.: a noun) and an action keyword indicating an action to be made on the item (i.e.: a verb);” and

“registering directory information of a new information site in the searching server (i.e.: storage area) together with an item keyword and an action keyword matching the contents information presented by the new information site in response to a request for registration of the new information site form a client terminal.”

In the same endeavor, Takahashi discloses a method and apparatus for extracting keyword from scheduling data using the keyword for searching the schedule data file wherein the keyword could be a noun, verb, etc. described in dictionary which stored in storage area or database server 1801[Takahashi, col 19 line 50-col 20 line 40, Fig 11]

Therefore it would have been obvious to an ordinary skill in the art at the time the invention was made to incorporate the technique of searching keywords such as noun and verb as taught by Takahashi into the Snyder's apparatus in order to utilize the two agents searching. Doing so would improve the processing time for network searching and provide the efficient results to the user [Snyder col 4 lines 52-59].

6. As per claim 3, Snyder-Takahashi disclose the prompting section provides a list of various item keywords and action keywords with the client terminal **such that** the

user can select a set of an item keyword and an action keyword from the list to formulate the query [Takahashi, the extract word list, col 18 lines 56-65, Fig 14C].

7. As per claim 4, Snyder-Takahashi disclose a database that stores the directory information of the information sites spread over the network together with the item keywords and the action keywords matching the contents information presented by the respective information sites.

8. As per claim 5, Snyder-Takahashi disclose the operating section can search for one (or more) information sites with reference to the database according to the query [Takahashi, the extract word list, col 18 lines 56-65, Fig 14C].

9. As per claim 7, Snyder-Takahashi disclose the registering section responds to the request for registration of the new information site from the client terminal, for providing a list of various item keywords and action keywords with the client terminal **such that** the user can select a set of an item keyword and an action keyword from the list in matching with the contents information presented by the new information site [Takahashi, the extract word list, col 18 lines 56-65, Fig 14C].

10. As per claim 8, Snyder-Takahashi disclose A client terminal apparatus in a system of searching for contents information presented by a plurality of information sites

Art Unit: 2142

over a network based on a query sent to a searching server through the network, the client terminal apparatus comprising:

an accessing section that accesses the searching server for establishing communication with the searching server through the network;

an input section that transmits the query to the searching server through the network, the query containing an item keyword indicating an item as a target of searching and an action keyword indicating an action to be made on the item, thereby enabling the searching server to search for one or more information sites having contents information matching the query;

an output section that receives directory information indicative of locations of the searched information sites from the searching server through the network; and

an operating section that operates according to the directory information for accessing the searched information sites, thereby enabling a user to make the action on the item.

11. As per claim 9, Snyder-Takahashi disclose the input section is provided with a list of various item keywords and action keywords from the searching server **such that** the user can select a set of an item keyword and an action keyword from the list to formulate the query [Takahashi, the extract word list, col 18 lines 56-65, Fig 14C].

12. As per claim 11, Snyder-Takahashi disclose the input section is provided with a list of various item keywords and action keywords from the searching server, **such that**

Art Unit: 2142

the user can select a set of an item keyword and an action keyword from the list in matching with the contents information presented by the new information site [Takahashi, the extract word list, col 18 lines 56-65, Fig 14C].

13. As per claim 15, Snyder-Takahashi disclose the computer- implemented step of registering information indicating another action corresponding to the action indicated by the registered action keyword [Takahashi, correspond keyword, col 15 lines 32-45].

14. As per claim 16, Snyder-Takahashi disclose Snyder-Takahashi disclose the registering section registers information indicating another action corresponding to the action indicated by the registered action keyword or verb [Takahashi, col 19 line 50-col 20 line 40, Fig 11].

15. As per claim 17, Snyder-Takahashi disclose the searching server registers information indicating another action corresponding to the action indicated by the registered action keyword or verb [Takahashi, col 19 line 50-col 20 line 40, Fig 11].

16. As per claim 18, Snyder-Takahashi disclose the index table memorizes a correspondence between information indicating another action and the action indicated by the registered action keyword or verb [Takahashi, col 19 line 50-col 20 line 40, Fig 11].

Art Unit: 2142

17. As per claim 19, Snyder-Takahashi disclose the step of registering information indicating another action corresponding to the action indicated by the registered action keyword or verb [Takahashi, col 19 line 50-col 20 line 40, Fig 11].

18. As per claim 20, Snyder-Takahashi disclose the searching server registers information indicating another action corresponding to the action indicated by the registered action keyword or verb [Takahashi, col 19 line 50-col 20 line 40, Fig 11].

Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner *Thong Vu*, whose telephone number is (571)-272-3904. The examiner can normally be reached on Monday-Thursday from 6:00AM- 3:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, *Andrew Caldwell*, can be reached at (571) 272-3868. The fax number for the organization where this application or proceeding is assigned is 571-273-8300

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval IPAIRI system. Status information for published applications may be obtained from either Private PMR or Public PMR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
